- ▶ USPS
- ▶ Federal Express
- ▶ ABF
- ▶ DHL
- ▶ Endicia
- ▶ Uber Freight
- ▶ XPO
- ▶ Pitney Bowes
- ▶ **Plus dozens more**

## Integrate Seamlessly to Shipping Carriers

Resolv Freight Management is a comprehensive shipping solution seamlessly integrating SAP Business One with various LTL (Less-than-Truckload) and FTL (Full-Truckload) shipping carriers, as well as multiple TMS (Transportation Management System) and multi-carrier shipping solutions.

This allows businesses to manage their entire shipping process within their existing SAP Business One system and eliminates the need to maintain separate databases for customer shipping addresses.

## Resolv Freight Management is the Bridge

Communicate directly to carriers from inside of SAP Business One and Resolv. The data is transmitted to the carrier's system and labels are created and printed without having to leave SAP Business One.

Resolv Freight Management's rate-shopping feature shows shipping rates and option by carriers, within the Sales Quote or Sales Order screen, providing accurate estimates of shipping charges to customers at order.

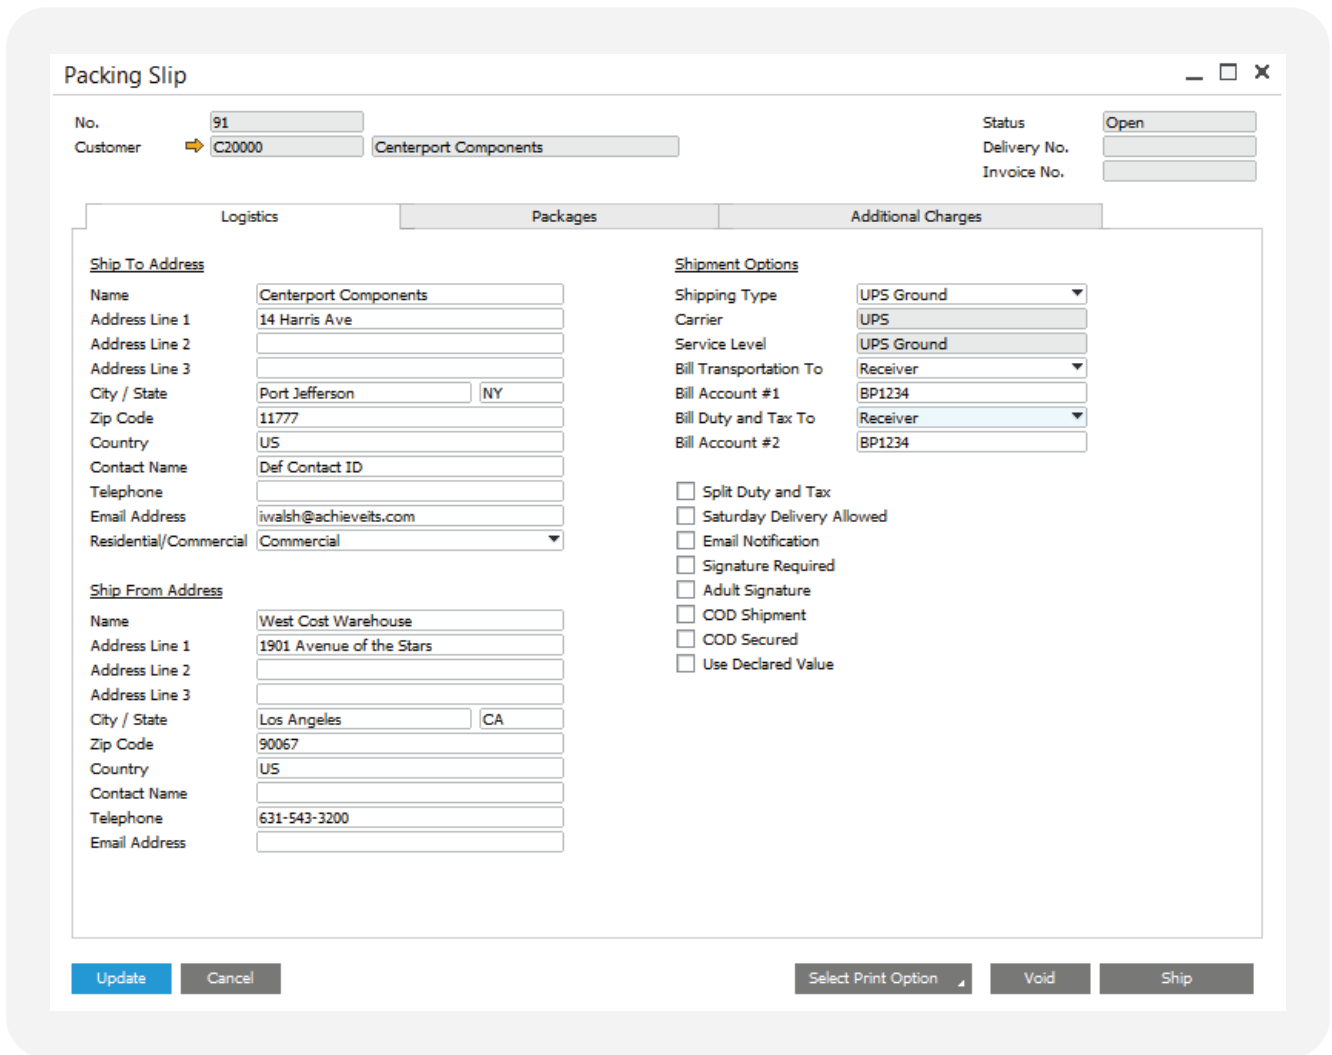

*"Resolv has really helped us provide more **accurate information to our team** and **ultimately our customers regarding the availability of our products**. The ability to track metrics more easily and calculate more accurate costs has proven to be a great benefit."*

### David Pearlman

Vice President at Welmed  
Logistics & Inventory Management

Resolv Freight Management provides centralized management of all shipping processes, including **carrier selection, rate shopping, shipment tracking,** and **document generation** from a single interface within SAP Business One.

It streamlines operations by automating shipping processes and reducing manual data entry and provides strong cost control by leveraging integrated rate shopping and carrier selection tools.

Resolv Freight Management’s support for various LTL and FTL carriers, as well as TMS and multi-carrier shipping solutions, allows for easy expansion and adaptation as your business grows and evolves. It generates and manage all necessary shipping documentation, ensuring compliance with industry regulations and standards.
