VistaVu Solutions: What We Do

VistaVu Solutions provides innovative business management software solutions to mid-market companies across North America. We leverage the experience of our people, and our successfully proven processes to bring solutions to our clients. Our goal is to deliver positive customer experiences and high levels of satisfaction to help companies RUN GREAT.

VistaVu Solutions Story

VistaVu is an employee-owned company founded by Jory Lamb, winner of EY's Entrepreneur of The Year award. We have a growing team of 75 staff with operations across North America. We believe in taking the time to regularly engage with our customers, understand where they are in their business, and help them scale and grow. Our customers directly impact our program initiatives and continuous process improvements. As a result, we have been consistently recognized for our high customer retention. Our team specializes in six core industries including:

- Discrete Manufacturing
- Wholesale Distribution
- Industrial Field Services / Rentals
- Industrial Machinery & Components
- Life Sciences
- Aerospace & Defense

SAP Gold Partner
VistaVu Solutions: What We Do

SAP

VistaVu Solutions provides full life-cycle implementation and support for SAP Business One and SAP Business ByDesign. Our experts leverage proven processes to help with risk mitigation, end-user training, and organizational change management to ensure a successful company wide adoption. Working with our team will result in a smooth ERP implementation that is capable of meeting current business needs and is flexible to scale as you grow.

boomi

VistaVu Solutions provides fast time-to-value scoping, implementation, and managed services for Boomi iPaaS. As a certified partner, we bring unique value as mid-market experts with deep ERP experience. We've connected ERP to other point solutions including ADP, Concur, Salesforce, Shopify etc. Our team supports your integrations with monitoring and error resolution, so your in-house IT team can focus on growth.

fieldvu

FieldVu leverages modern technologies, such as Cloud, Mobile, and Industrial Internet of Things (IIoT) to help companies better manage, automate, and track its operations to become a more intelligent enterprise. FieldVu is a complete field service management solution that integrates seamlessly with SAP Business One & SAP Business ByDesign to streamline processes from field ticket to invoice.

resolv

Resolv is a fully integrated suite of distribution, logistics and warehouse management software, developed for and powered by SAP Business One. Resolv is designed to optimize freight, shipping and warehouse operations to reduce operating costs, while increasing productivity, quality and revenue with integrated and mobile supply chain technologies.

Tailored Solutions

Our technical team of SAP SDK developers can help to configure screens and automations for better customer specific efficiencies. We've developed integrations between ByDesign and ADP payroll, Oanda exchange rates, ecommerce systems, third party logistics and Vertex tax packages. Additionally our products technical team has done screen customizations, integrations with Paymate, Ceridian and Toolhound for our Business One customers. Most recently we leveraged our relationship with AWS as a partner and created IoT solutions that accelerated a customer's time to market for a new product.

What Our Clients Are Saying

"I can't say enough about the VistaVu Solutions team, they are outstanding."

\- Matthew McAra

CARIBOO OUTDOOR DISTRIBUTORS

"Making the switch to an SAP Partner with industry and product expertise made a significant difference in our business."
