FieldVu Back-Office

Automated Field Service Management Software for Complex Operations

Centralize Systems & Data | Gain Strong Financial Control | Improve Job Profitability

KEEP MORE OF WHAT YOU MAKE

Inadequate Systems Cripple Profitability

As a field service company grows, administrative work can become overwhelming. Home-grown systems such as job whiteboards, paper documents, and a landscape of disconnected software will hinder scalability. Repetitive work reduces employee effectiveness, siloed data prevents accurate reporting, and slow error-prone processes hurt your bottom line. For 10+ years, FieldVu has helped companies streamline office processes with a solution that combines ERP, automation, and field service functionality.

> There is a lot less time spent on accounting now and a greater standardization in our processes. We are in a better position to get real-time information to make quantitative business decisions.
>
> **Sandra Heit, Hines Industrial Services**

ALL-IN-ONE SOLUTION

FieldVu components work together cohesively with deep bi-directional integration to ERP.

Back-Office

Mobile — ERP System (SAP®) — FieldVu IIoT
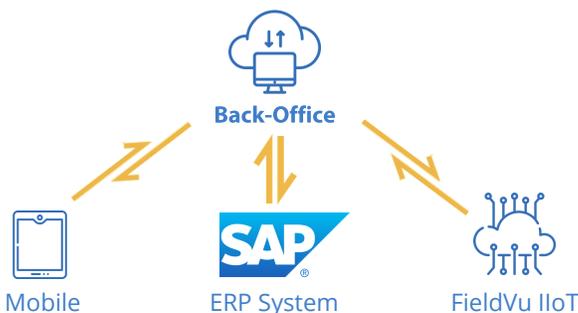

INSIDE FIELDVU BACK-OFFICE
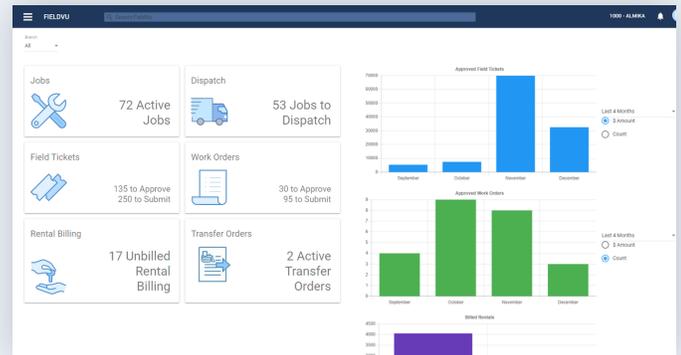

JOB MANAGEMENT

Stay on top of jobs, field tickets, work orders, and more with no need for data re-entry.

- Organized job board with filter & search.
- Adjust job details with a few clicks.
- Automatic updates across components (e.g. ERP).
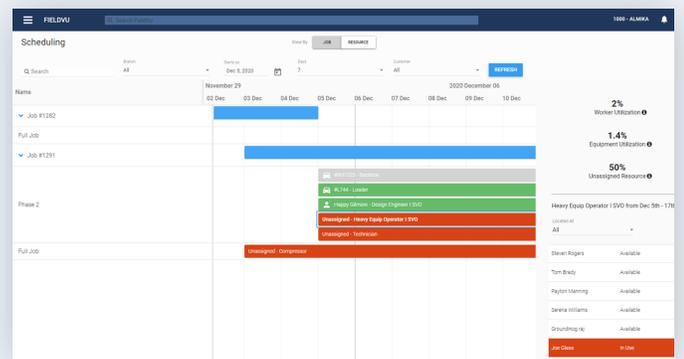

SCHEDULE & DISPATCH

Get the right field staff and resources on the job to deliver a stronger customer experience.

- Intuitive drag & drop scheduling board.
- Ensure field staff have relevant job information.
- Get important insights on resource availability.

END-USER BENEFITS

Office Workers
Eliminate mundane work to increase productivity and satisfaction.

Executives & Managers
Centralize data to enable timely reporting and decision making.

Assets & Equipment
Reduce down-time & improve maintenance.

Customers
Deliver accurate invoices and improved services.

Your Business
Grow and keep more of what you make.

PROVEN RESULTS

20 Hours per month per employee saved after removal of duplicate processes.
