EDI

Move to Paperless Document Exchange with EDI

Resolv EDI is a tightly integrated solution for SAP Business One, that includes all the components needed to send and receive EDI data with your customers and vendors. Affordable and easy-to-use, yet a very robust EDI software. VistaVu EDI helps automate and streamline transaction processing between your company and your trading partners. Resolv EDI users have the option to connect with their trading partner via Value Added Networks (VAN), a direct connection or through File Transfer Protocol (FTP).

At VistaVu Solutions, we provide our clients with outstanding and highly personalized services to support their EDI environment. As a Gold Level SAP Partner, our highly skilled development staff has a comprehensive technical and functional understanding of both SAP Business One and EDI. This combined skill set provides our clients with custom EDI transactions and mappings to meet their transactional requirements and specifications.

Core Features and Functionality

With Resolv EDI, users can increase the accuracy and efficiency involved with the input and processing of business transactions, while reducing order throughput time and related administrative costs associated to the business transaction process.

- Increase your company's competitive advantage by opening new opportunities with customers and suppliers
- Increase cash flow by reducing your invoicing, payment cycles and charge back fees
- Reduce time between sending and receiving of transactions from customers and vendors
- Provide uniform data format for customers and vendors
- Eliminate keying, re-keying and data entry errors that often occur with manual processing or other EDI systems not integrated into SAP Business One
- Streamline business processes

Benefits of EDI

Electronic Data Interchange (EDI) is the computer-to-computer exchange of business documents in a standard electronic format between business partners. By moving from a paper-based exchange of business documents to one that is electronic, businesses recognize major benefits such as reduced costs, increased processing speeds, reduced errors and improved relationships with business partners. EDI replaces postal mail, fax and email.

Technologies Supported

Resolv EDI can translate numerous data formats to and from SAP Business One from your various trading partners. The following data formats can be translated by Resolv EDI:

- EDIX12
- EDIFACTS
- Flat File
- CSV
- JDBC
- ODBC
- MS-SQL
- PROGRESS
- X12
- XML

Customer specific EDI transaction rules are configured within SAP Business One, provides logic that has EDI transactions flow seamless within the system and matching their internal business requirements, as well as their trading partner's unique requirements.

EDI mapping provides ability to template data maps between trading partners within SAP Business One and their respective applications.
