- ▶ Detailed transaction information in one place
- ▶ Multiple UoM provides flexibility
- ▶ Provides for advanced serial & batch allocations

Warehouse Management in a Flash

Resolv WMS has been developed specifically for SAP Business One with SAP Fiori and SAP BTP, allowing you to access information at the speed you need.

Resolv takes advantage of popular handheld devices such as tablets and smartphones, adding the freedom of speed and instant access to the warehouse logistics network wherever Wi-Fi is available.

Fully Integrated, Fast & Accurate

Resolv WMS gives you everything you need to manage your business with speed and accuracy. A mobile-first approach provides the ability to keep track of everything, everywhere, while you are on the move.

Designed to optimize freight, shipping, and warehouse operations through instant access to real-time data so you're always in-the-know.
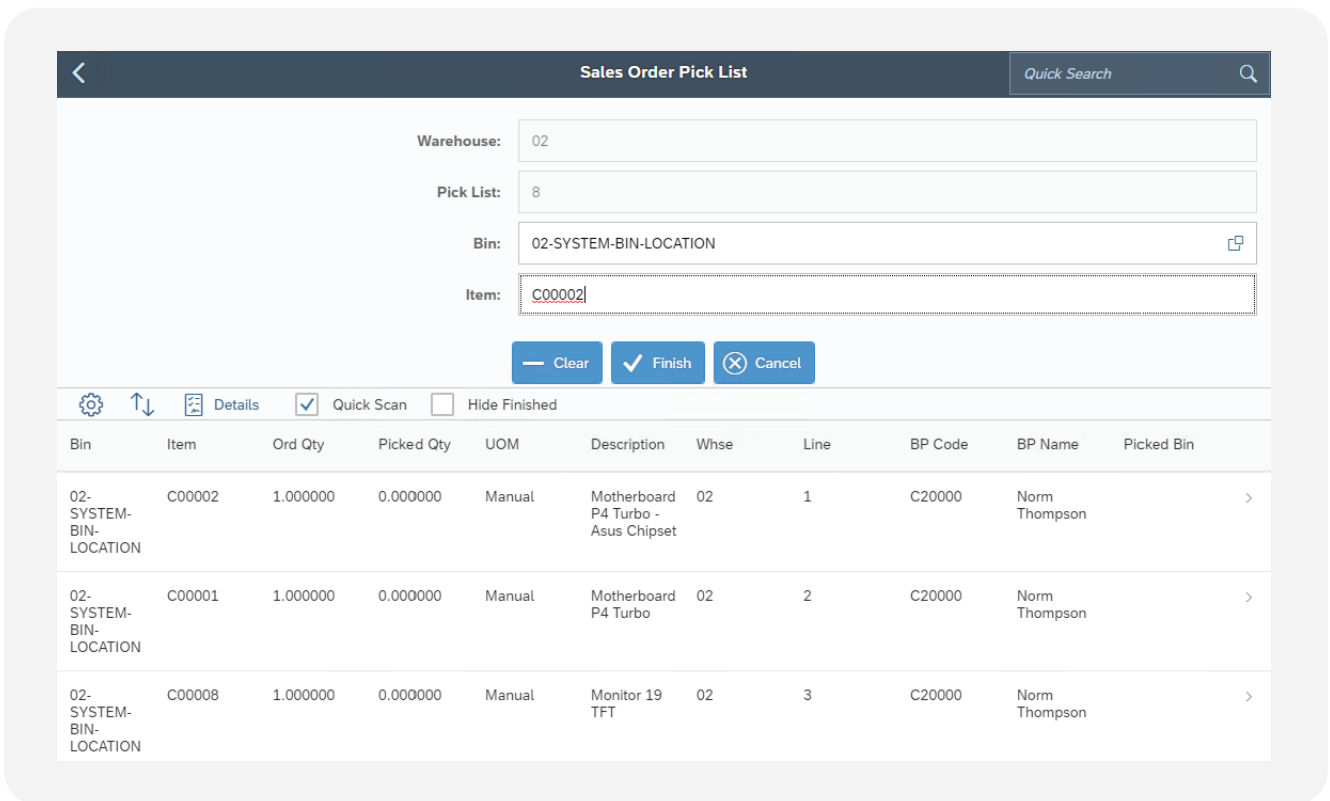

> *"Resolv has really helped us provide more **accurate information to our team** and **ultimately our customers regarding the availability of our products.** The ability to track metrics more easily and calculate more accurate costs has proven to be a great benefit."*

David Pearlman
Vice President at **Welmed**
Logistics & Inventory Management

Resolv WMS has been designed to enhance overall company productivity with features like directed put-away and wave picking to save valuable time. It simply helps you do more.

Innovative features utilize mobile device camera and image attachments to reduce errors and capture damaged items and built-in messaging simplifies communication with the office and other workers.
