

Inventory Counting in SAP Business One provides a streamlined, efficient and controllable inventory counting process across your entire business, resulting in up-to-date and accurate inventory levels.

The screenshot shows the SAP Business One Inventory Counting interface. At the top, there are fields for Count Date (11/23/2021), Time (09:11), No. (Primary 2), Counting Type (Single Counter), Inventory Counter (User Shannon Kenne), Status (Open), Ref. 2, and End of Fiscal Year. Below these are tabs for Contents and Attachments, and a Referenced Document field. A search bar is present with 'Find' and 'Warehouses' dropdowns. The main table lists items with their descriptions, warehouse locations, and quantities. The table data is as follows:

#	Item No.	Item Description	Freeze	Whse	Bin Location	In-Warehouse Qty ...	Counted	UoM	Counted Qty	Counted Qty	V...
1	200345555	Insignia - Protective	<input type="checkbox"/>	01	01-A1-S2-I	496.000	<input checked="" type="checkbox"/>		496.000	496.000	
2	200340001	Insignia - Apple MFI	<input type="checkbox"/>	01	01-A1-S1-I	341.000	<input checked="" type="checkbox"/>		701.000	701.000	
3	20104001	Samsung - Galaxy B	<input type="checkbox"/>	01	01-A1-S2-I	1.000	<input type="checkbox"/>		505.000	0.000	
4			<input type="checkbox"/>			0.000	<input type="checkbox"/>			0.000	
						838.000				1,197.000	0.000

To conduct the counting for a selected range of items, you can either choose items recorded in SAP Business One or import items from a pre-prepared Excel file.

SAP Business One's dynamic Inventory Counting process can be performed by single or multiple counters.
